MEASURING GUIDE

MEASURING EXAMPLE

COUNTERTOP MEASUREMENT		
NO	LENGTH X WIDTH (INCH)	SQ. INCHES
1	96" x 25.5"	2,448
2	72" x 36"	2,592
3		
4		
TOTAL SQ. INCHES :		5,040
TOTAL SQUARE FEET (DIVIDE BY 144) :		35

HOW TO MEASURE YOUR COUNTERTOP

- Measure the length and width of each countertop section in inches, as illustrated in the example diagram on the left. Round all measurements to the nearest half-inch.
- Record these measurements in the table on the back of this page as you measure each section.
- Calculate the area of each section by multiplying the length by the width to get the area in square inches.
- Add up the areas of all sections to determine the total square inches of your countertops.
- Divide the total square inches by 144 to find the total square footage of your countertops.

HOW TO SKETCH YOUR KITCHEN

Using the graph paper on the back of this page, sketch the layout of your countertops. Each square on the graph paper represents a 1' x 1' area. Mark the following on your drawing:

- Finished edges (indicate with a "0")
- Walls
- Backsplash areas (use "BS" to denote)
- Cooktops
- Free-standing and drop-in ranges
- Dishwasher
- Refrigerator
- Sink

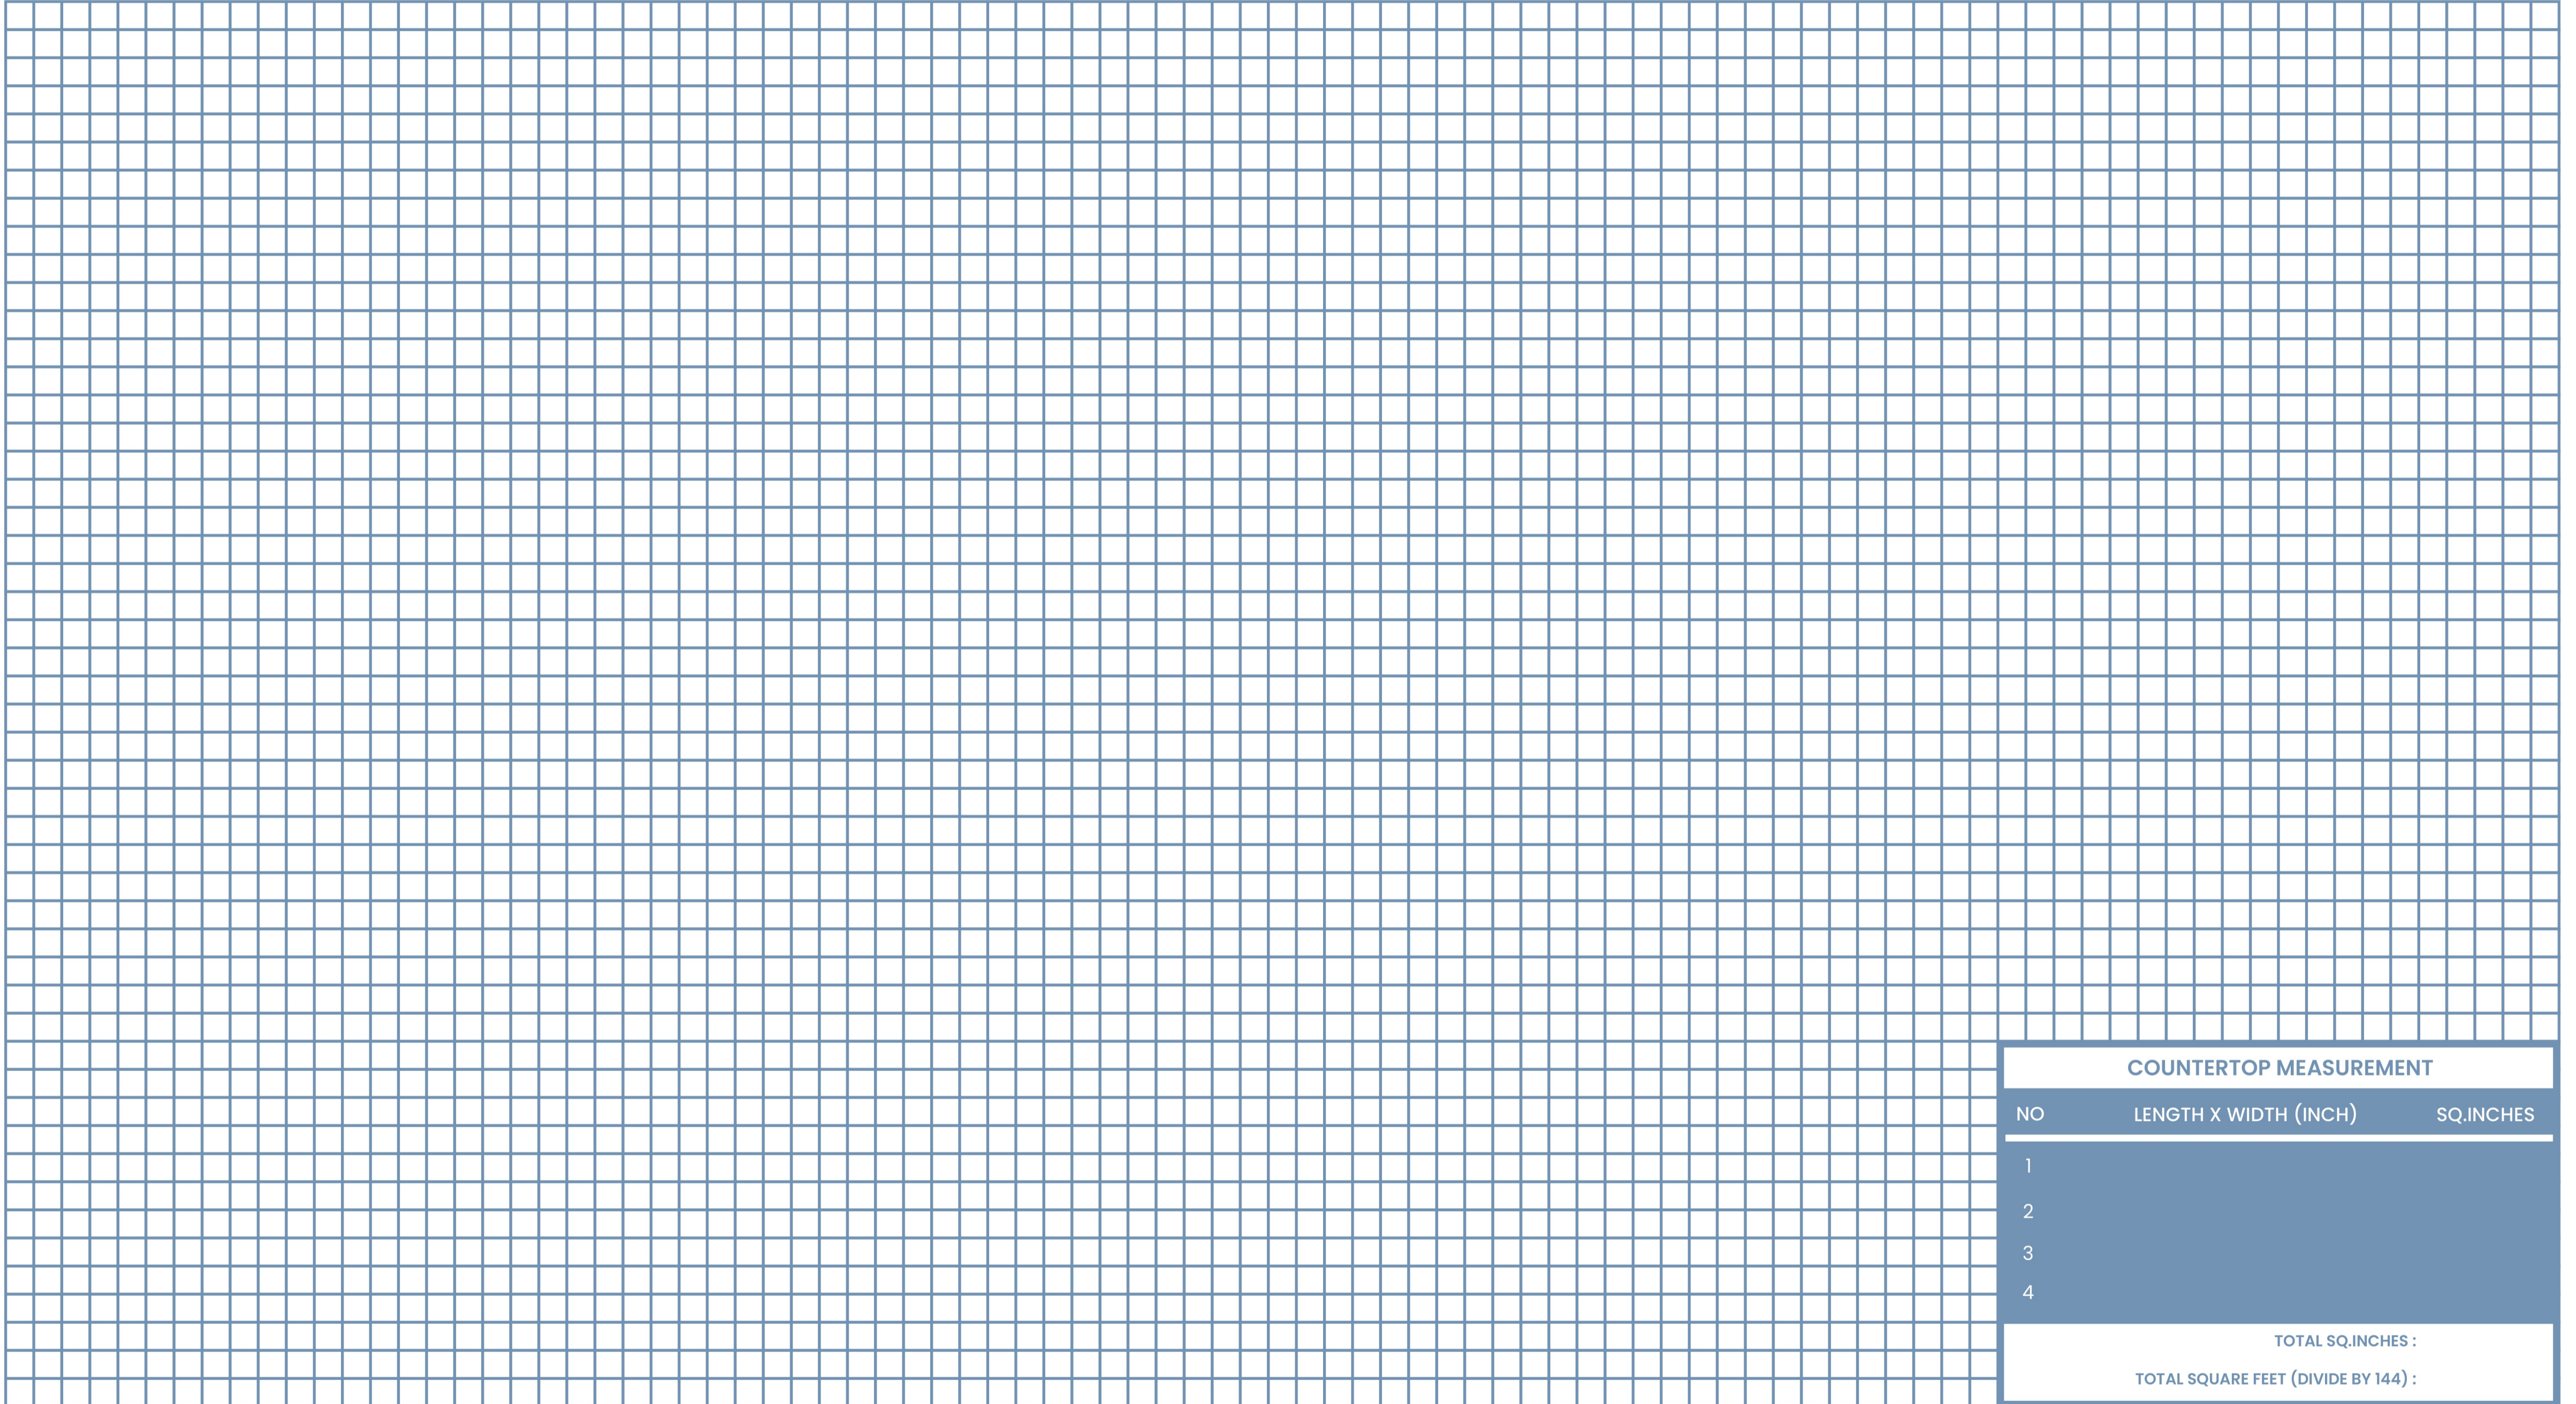

SUBMIT YOUR COMPLETED WORKSHEET TO ADM

Detach the filled-out worksheet along the perforated edge on the left and take it to an ADM Sales Associate at a custom countertop location. This worksheet is intended solely for estimation purposes and is not a binding contract. The actual measurements for your countertop may differ from what's recorded on the worksheet, so your final cost might not match the estimate provided. If you choose to order your countertops from ADM, a Certified Countertop Fabricator/Installer will take accurate measurements before the fabrication and installation process begins. Please remember that this estimate is non-binding and may change. The precise cost will be calculated by the Designer/Associate after a professional fabricator measures your space. Minimum order quantities may apply. This estimate is provided for general reference only and should not be relied upon for
